

City Services by Petition or Request

It is the policy of the City to provide for the paving of streets and installation of curb and gutter on petition of a majority of the property owners. Under this policy fifty percent of the cost of such construction is assumed by the City.

It is the policy of the City to provide sidewalks on petition of any property owners or by mutual agreement, with 25 percent of the costs of such construction assumed by the City.

It is the policy of the City to provide for storm drainage on mutual agreement of property owners with the property owner providing or paying the costs of all pipe and the City installing them.

It is the policy of the City to provide street lights at intersections in blocks that exceed four hundred and fifty feet upon request and when funds are available. These are installed by agreement with Carolina Power and Light Company.

It is the policy of the City to install concrete street name signs. These are installed by means of the annual budget to the Street Department.

It should be understood that the problems of municipal administration require the budgeting of all funds. Therefore, many of the above services available on petition or request are only constructed when funds are available. This implies that these services are not immediately available, but that the City must consider the requests in its fiscal planning and budget.
